

Minutes-Brookfield Inland Wetlands
Special Meeting October 9, 2012
Site Walk at 101 Obtuse Rd "Whispering Glen"
APPROVED

Present: Jim Vulcano, Sharon Fox, and Maurice Downey
Not present- Geoff Hunton , Larry Miller(recused from the Application)

Present for the Applicant: Peter Young, Dinas Virbickus
Location : 101 Obtuse Rd

Chairman, Jim Vulcano called the meeting to order at 5:00 PM

Mr. Vulcano noted the purpose of the meeting was to allow the Commissioners to see some options related to the detention basin near the front entrance which empties into Beers Brook.

Mr. Young pointed to a staked area which would be the size of one of the multiple detention basin improvements under consideration. All present noted this option would eliminate a tree line on the easterly side.

Mr. Young then noted another option. This option includes creating an overflow basin adjacent to the existing basin. This option would still require an enlargement of the existing basin, but less than the current staking and would not require the existing tree line to be removed. The revised existing basin would have new metering weir for overflow into Beers Brook, but in a significant storm would also overflow into a new basin on the SW side. This new overflow basin would also over flow into Beers Brook. He said construction of this new overflow basin would allow the removal of a number of invasive barberries. Every one agreed this option had significant advantages over the current staked plan. Mr. Young agreed to provide additional details of this plan at the October 15,2012 meeting.

Mr. Vulcano thanked Mr. Young for his time.

Mr. Downey made a motion to adjourn at 5:15 AM, S. Fox second, motion carried 3-0.
