

The Old Bridge Bird Sanctuary is a 25.3 acre park that was deeded to the Town of Brookfield in 1965 by CL&P.

Black capped chickadees have a black cap and bib with white cheeks. They are curious and have little to no fear of humans.

The tufted titmouse spends a lot of time on the ground searching through leaves. They usually stay in small groups of parents and offspring.

A male house finch's breast and front of the head is red. While the female has no red color and a brown body.

The downy woodpecker is the smallest woodpecker. Unlike most, it has a long white stripe on its back. It drums on trees with about 17 beats a second.

#### Directions:

After passing Brookfield High School on your right, continue straight through the 4-way stop. Travel about 1.5 miles, turn right onto Old Bridge Road. Veer right when the road splits. Parking is on the right at the end of the road.

## THE OLD BRIDGE BIRD SANCTUARY

57A Old Bridge Road  
Brookfield, CT

## Old Bridge Bird Sanctuary Rules:

- No littering. Please take only pictures and leave only footprints.
- Camping by permit only.
- Leave the plants and animals as you found them.
- Absolutely no open fires.
- No motorized vehicles.
- Dogs must be leashed.
- No alcoholic beverages.
- No hunting or firearms.
- Report any trail hazards or sick animals to the town at 203-775-7310.

Hiking is a great way to exercise outdoors with family and friends!
