

Be Part of a Global Bioblitz!

Join The Maritime Aquarium this spring in one of the planet's biggest annual bioblitzes. Let's get Fairfield and Westchester counties on the map!

Now in its eighth year, City Nature Challenge is an annual competition to see who can make the most observations in nature while engaging the most people. More importantly, it provides an important global snapshot of local biodiversity. Last year, 445 cities in 47 countries made 1.7 million observations, documenting more than 50,100 species!

The Maritime Aquarium is hosting Fairfield & Westchester Counties' team for City Nature Challenge 2023 and we'd love for your organization to be involved, both before and during the four-day observation weekend April 28-May 1.

- Spread the word! Let your guests, staff and volunteers know and encourage them to make observations.
- Offer a training session on how to use the reporting app/website, iNaturalist.
- Host events, such as a guided walk or your own bioblitz, to encourage observations.

APRIL 28 - MAY 1, 2023

- Everyone can do it everywhere.
- All you need is a cell phone or camera and the iNaturalist app.
- Find wildlife. Take a photo. Share!
